The Primary Logo serves as the main identifier of our business across all brand applications, embodying our core values and character.

[Aims to evoke elegance, empathy, and healing through art. Visuals must feel calm, intimate, and sophisticated, combining soft textures, golden accents, and nude tones that reflect transformation and trust].

The Symbol can be used when the Primary Logo is deemed unnecessary or when there is a lack of space to ensure legibility.

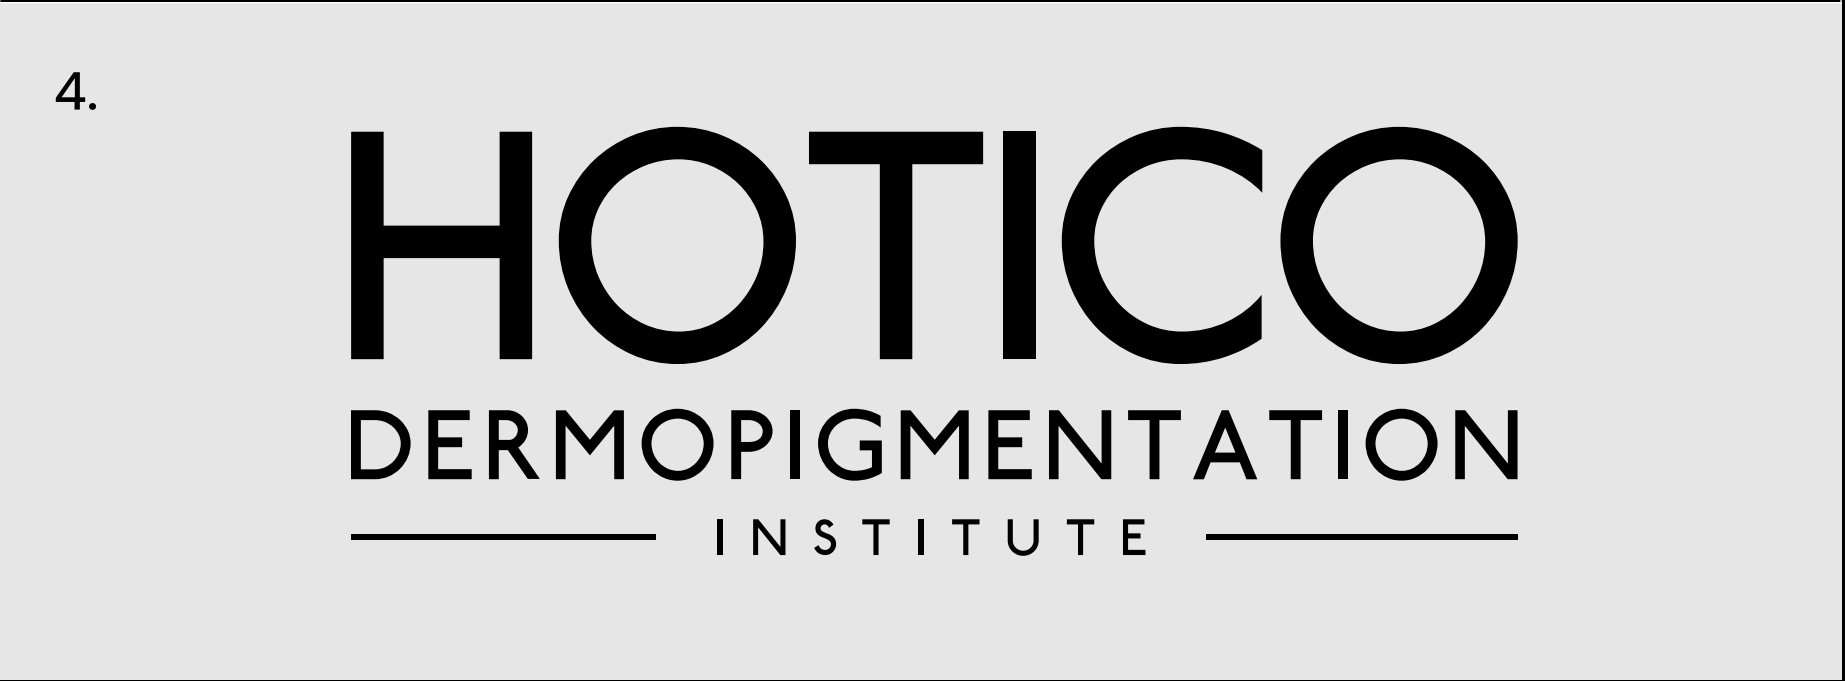

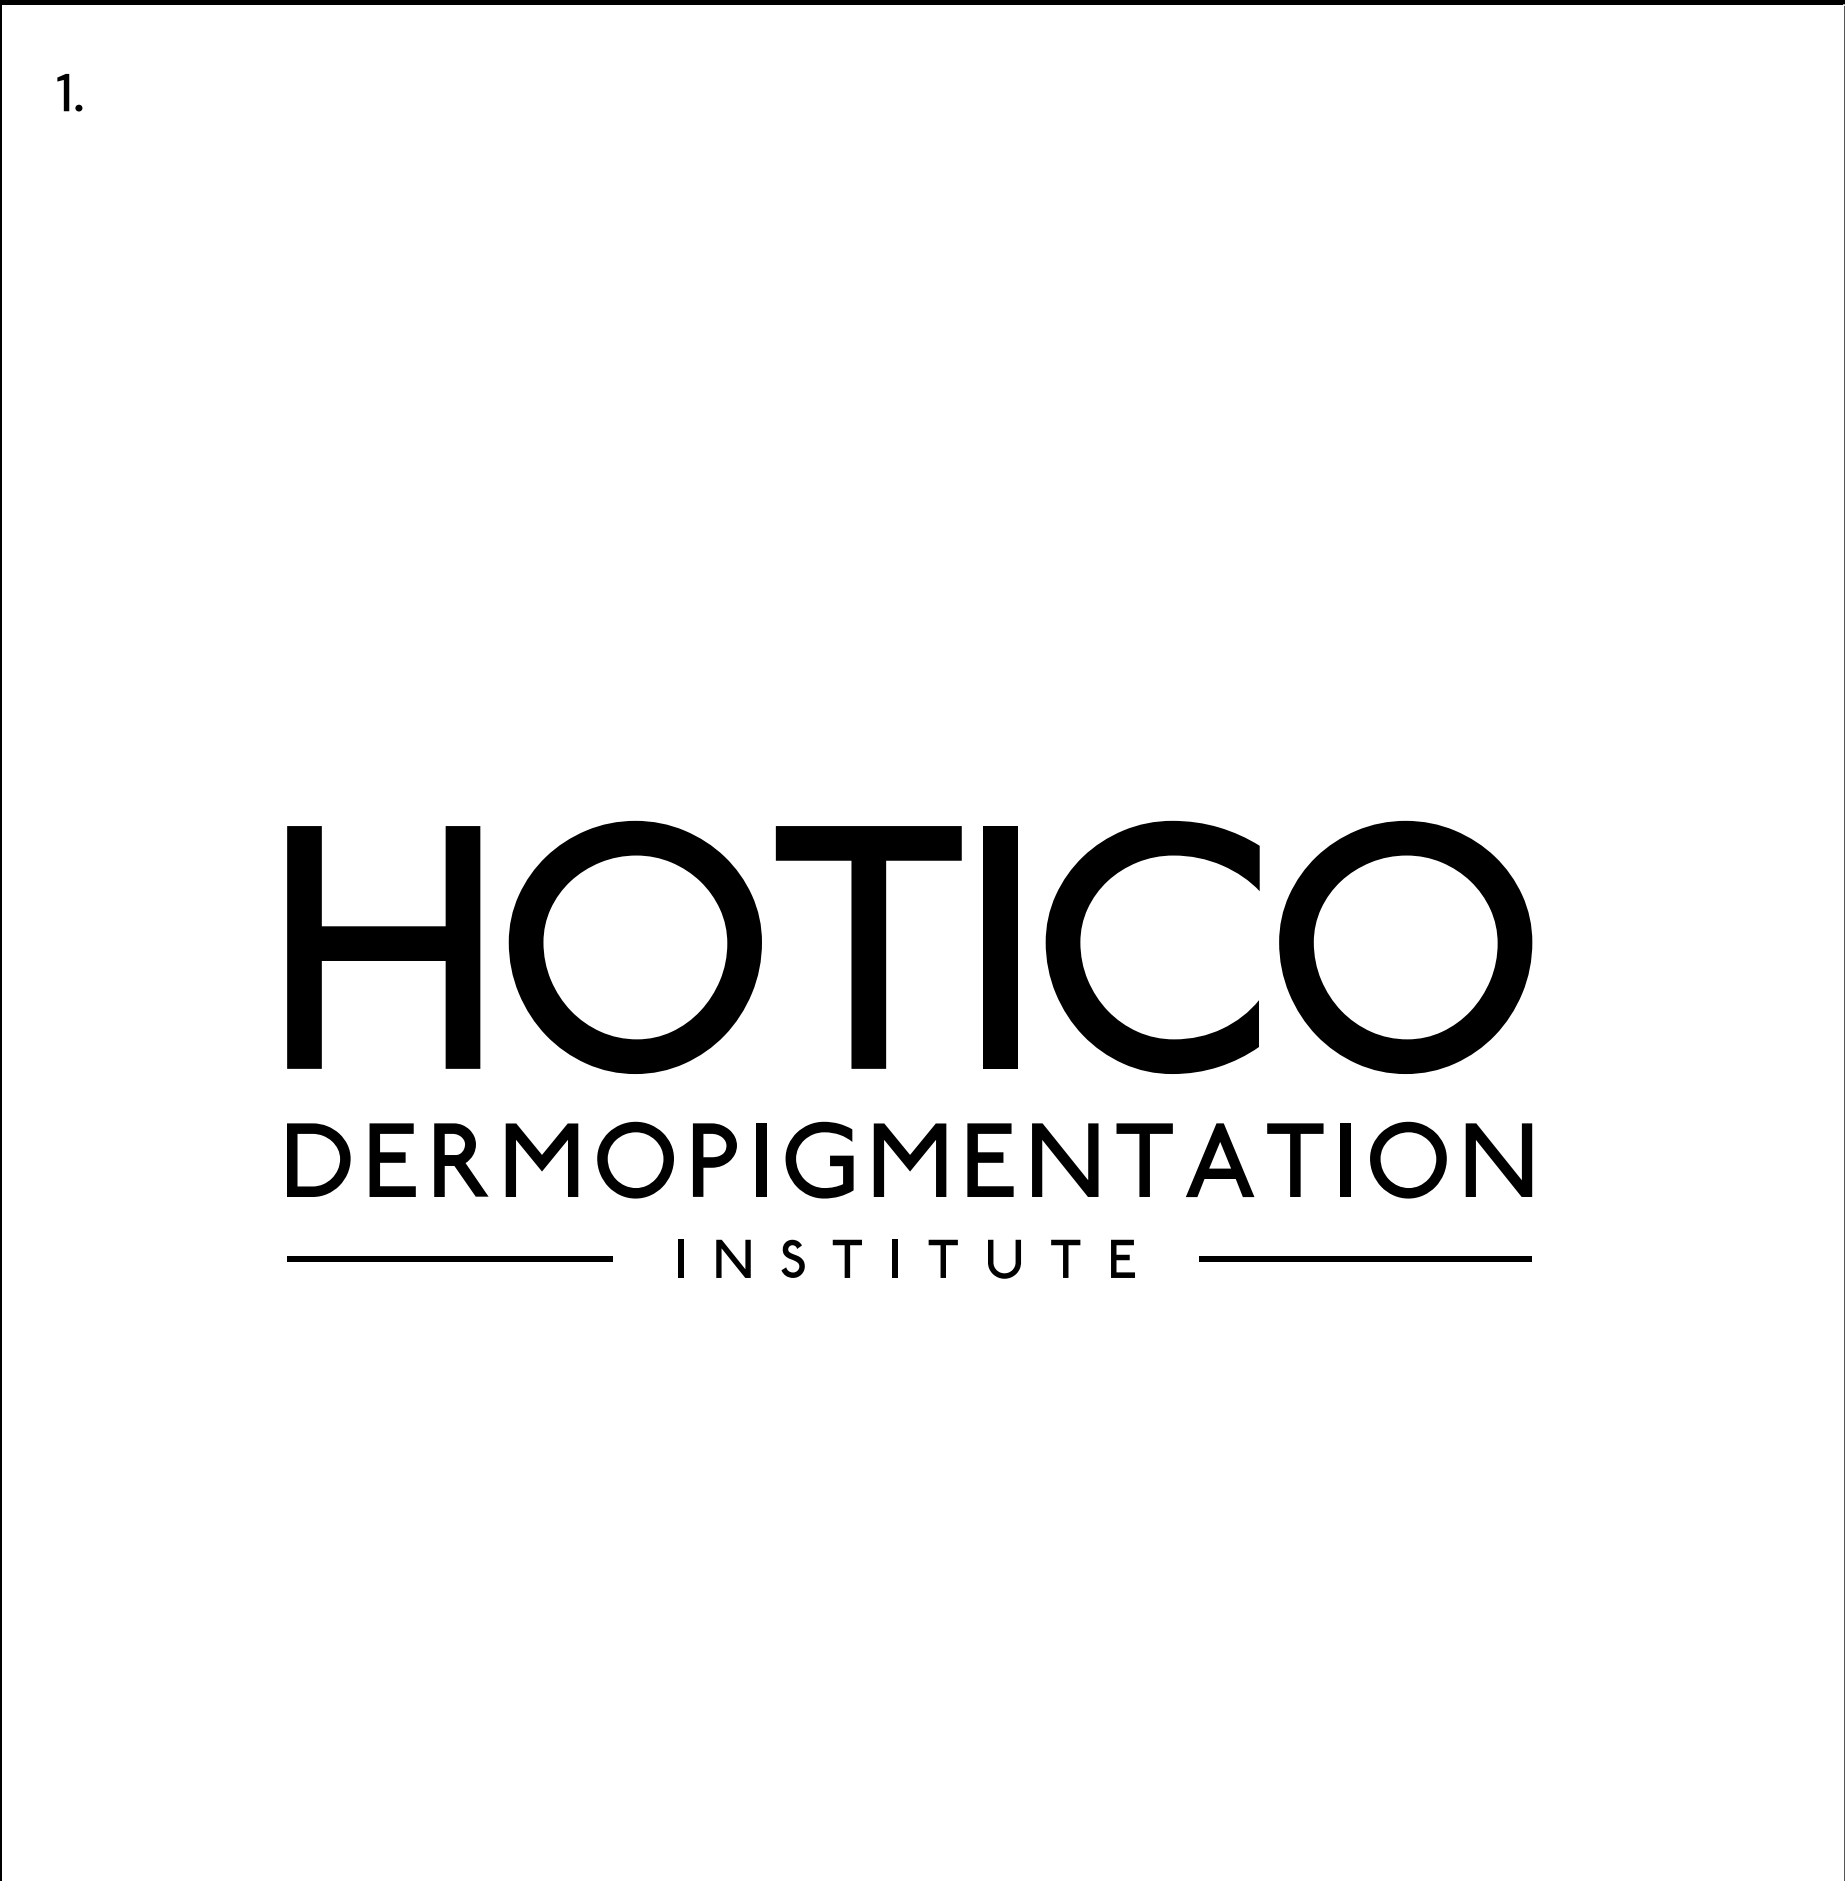

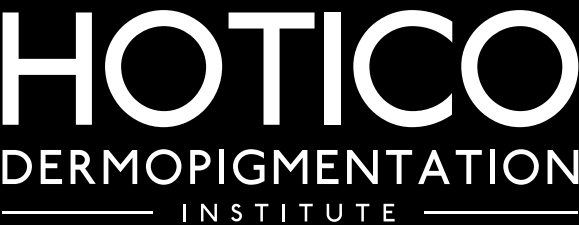

For example, it can be used on social media profiles, small-scale print, web favicons etc.

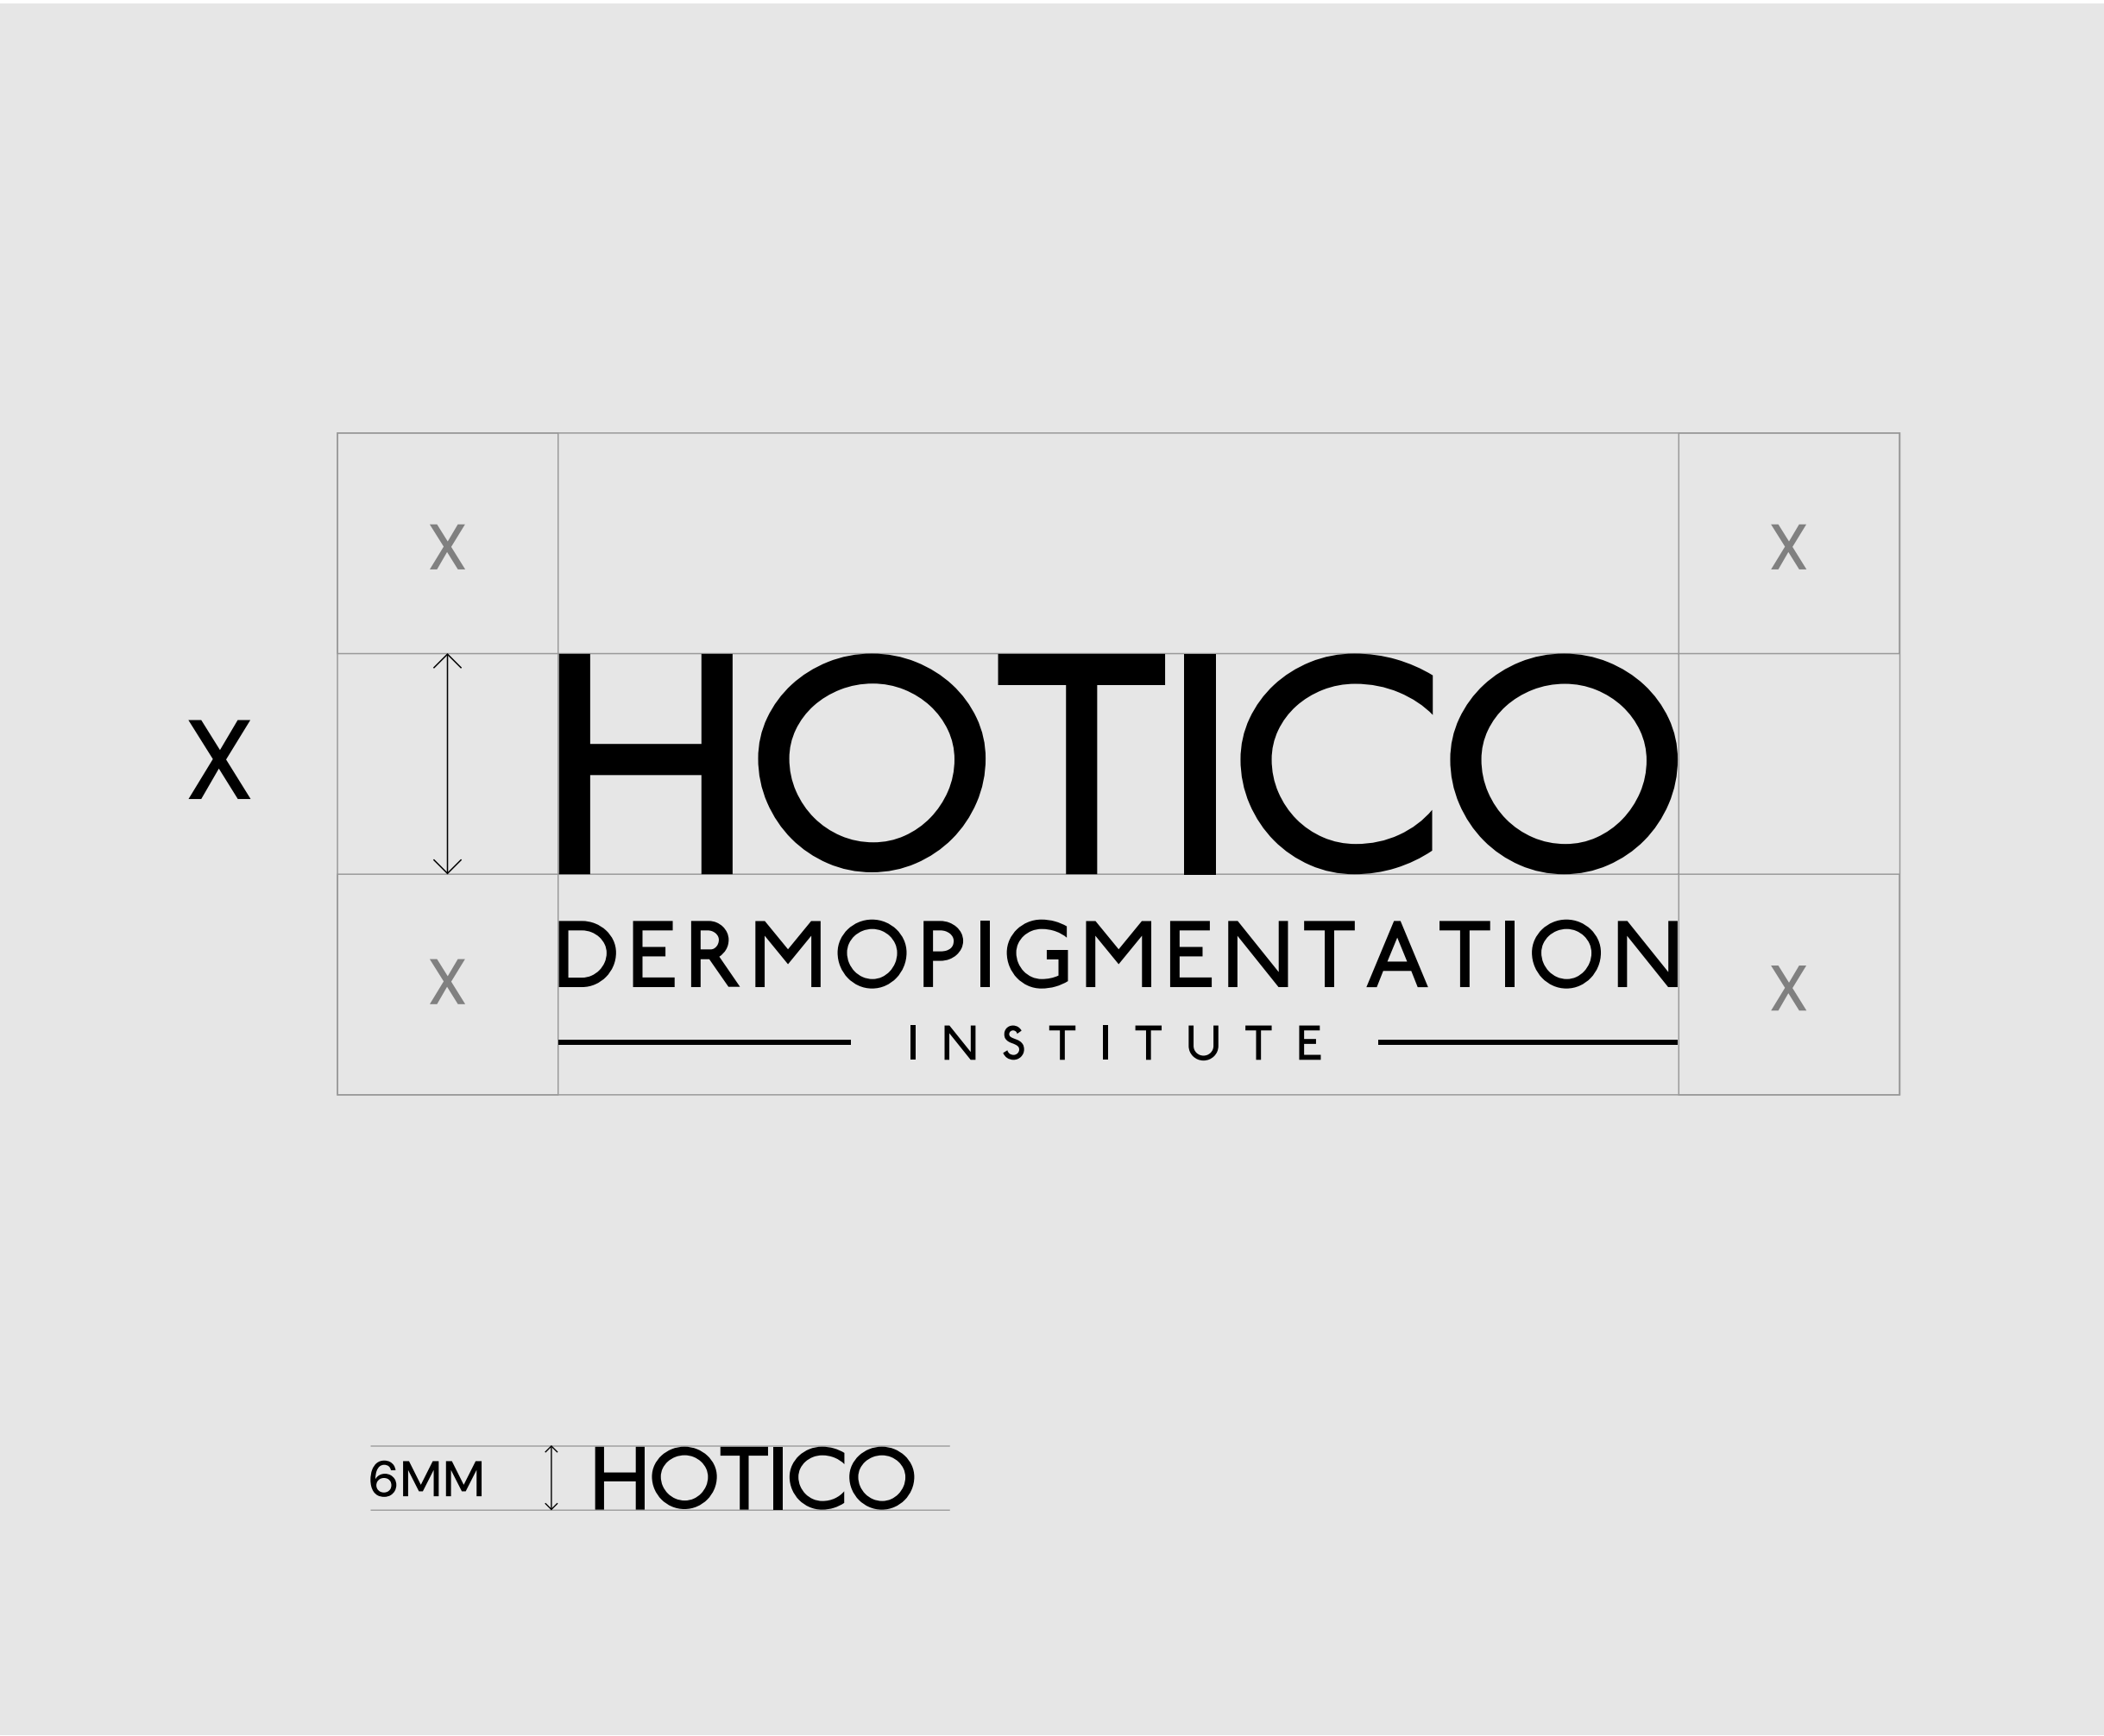

When applying our logo across various brand communications, it is crucial to maintain legibility and visual impact.

We advise [four] applications relating to color implementation, which also apply to our Symbol:

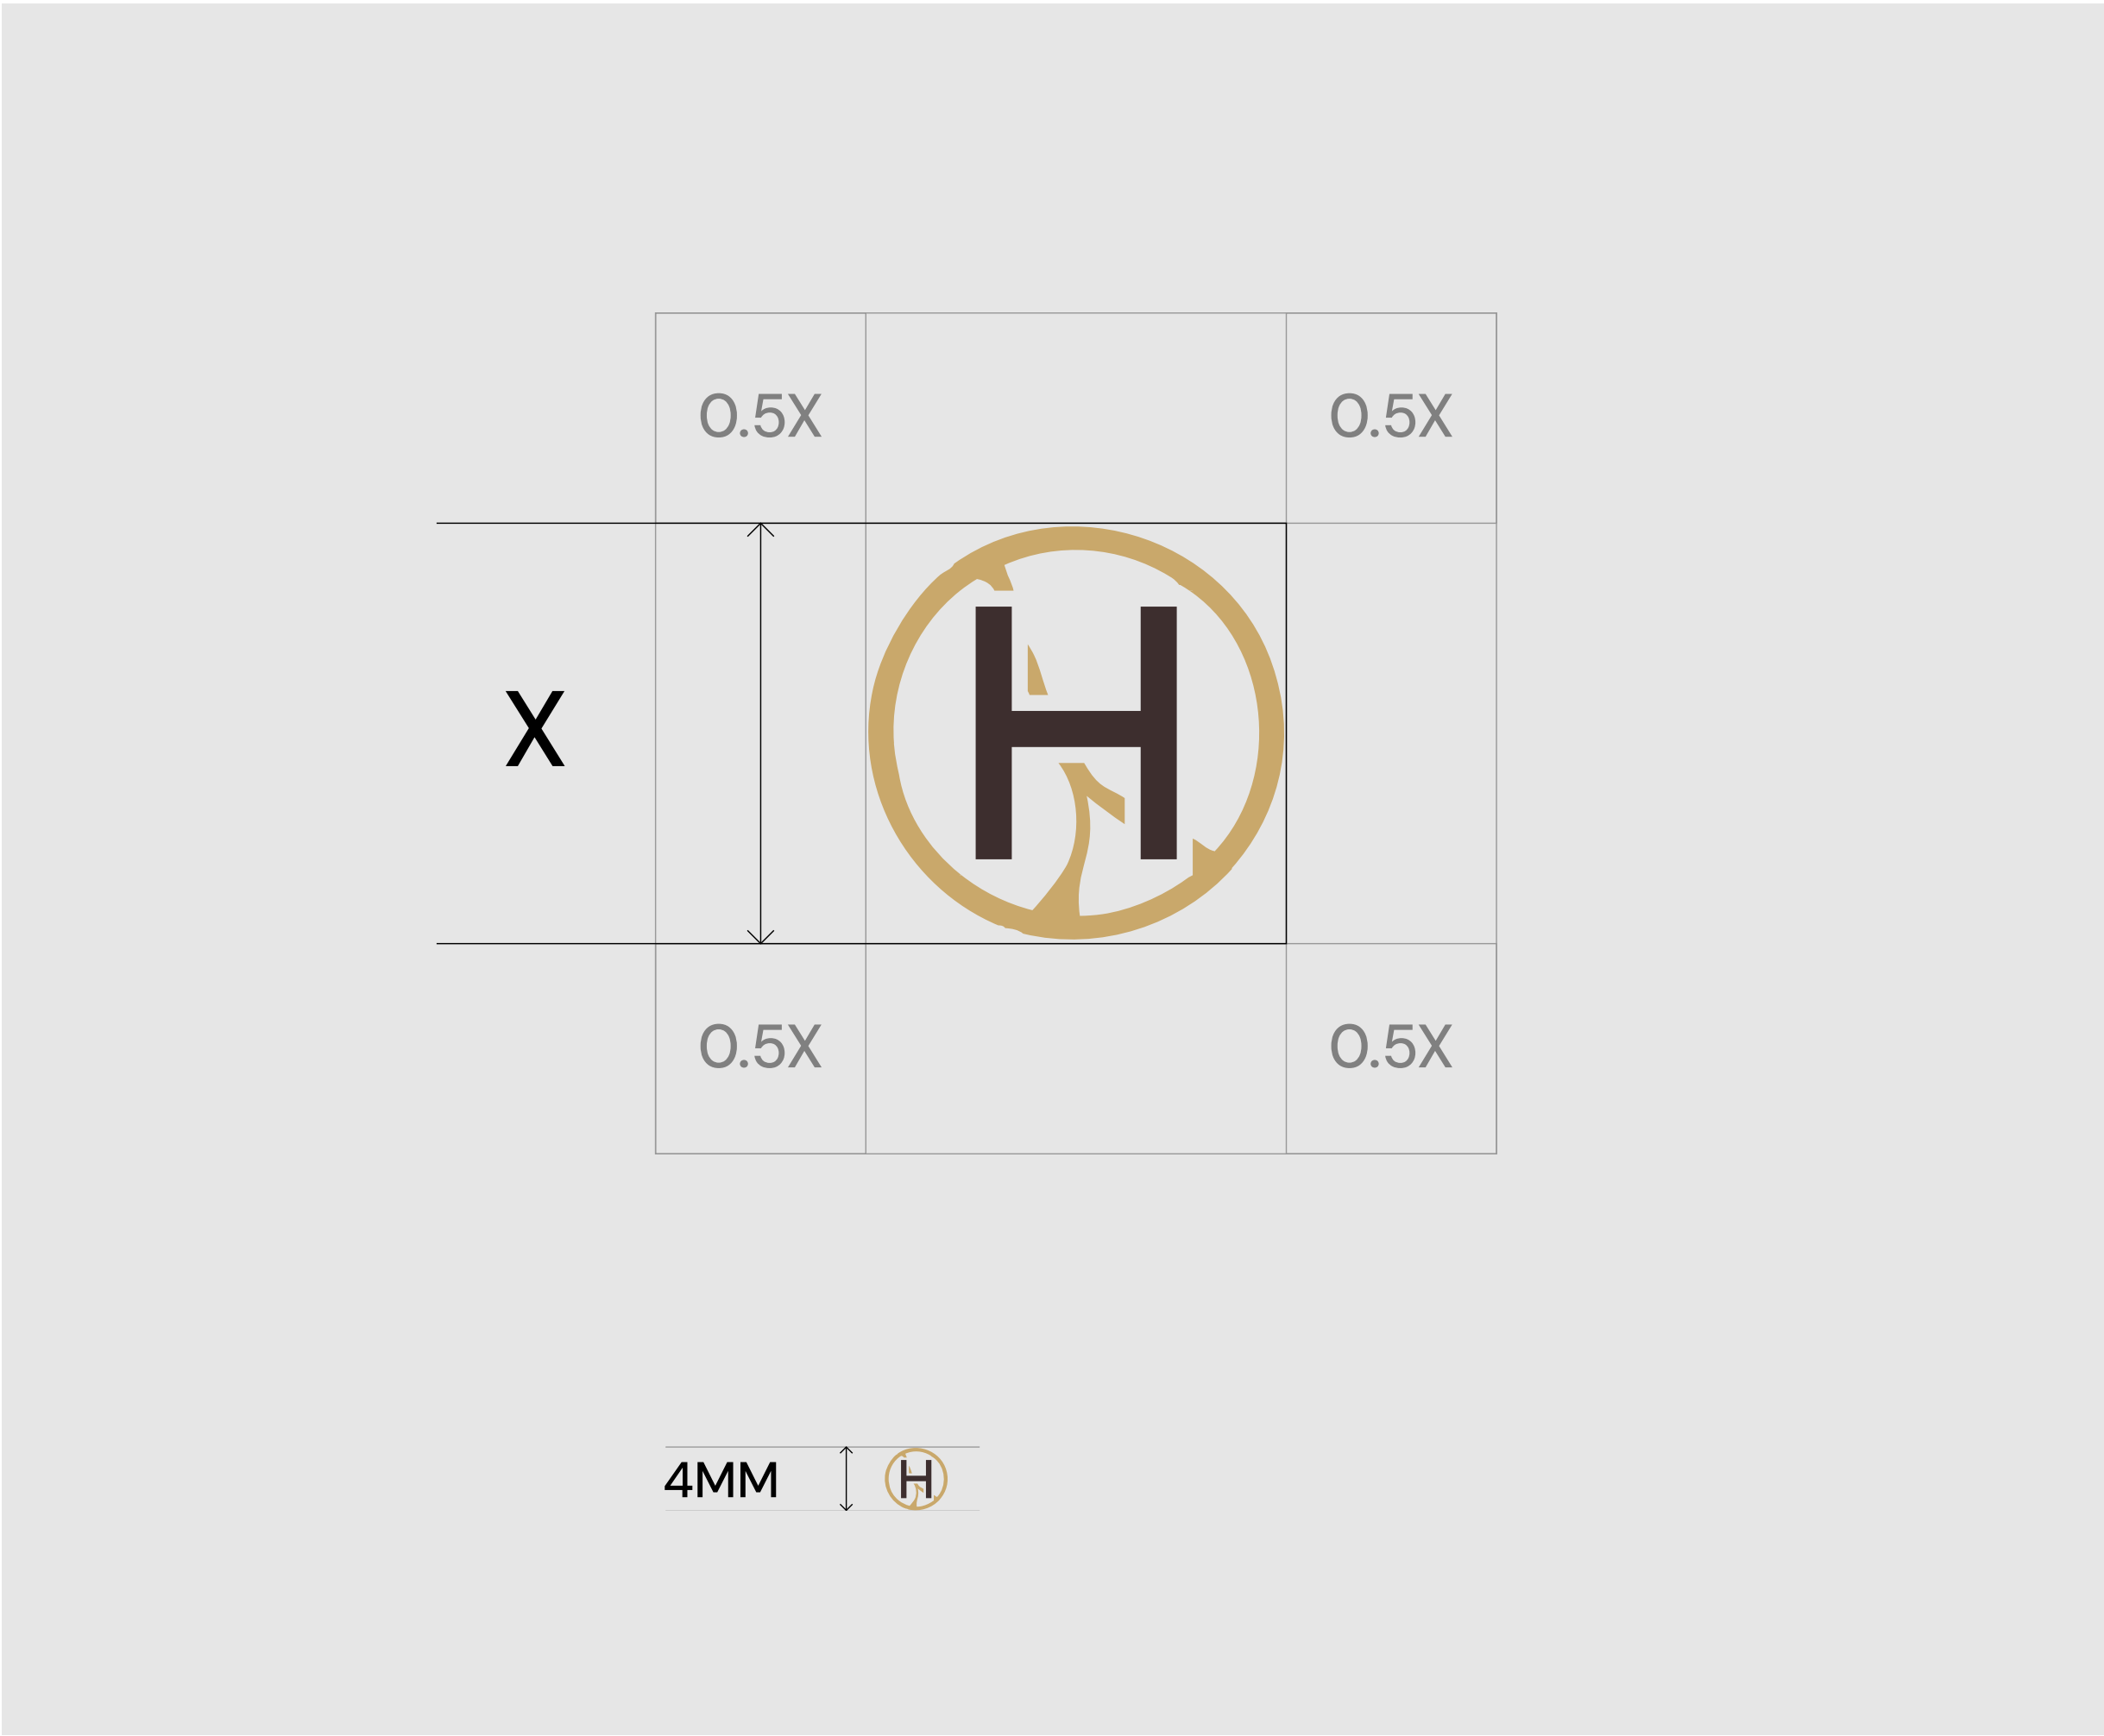

- [1. Black on White]
- [2. White on Black]
- [3. Black on Gold]
- [4. Black on Grey]

To establish a strong brand identity across all communications, it's essential to maintain consistency in font usage. [Raleway], our Primary Typeface, has an [aesthetic feel that expresses quiet luxury and emotional depth, blending medical awareness with artistic beauty]. It should be the default typographical choice throughout the brand.

In cases where [Raleway] is unavailable, [DMSans] may be substituted. For example in

We use three weights of **Raleway** across our brand.
